5. Fluoride Fee. The current monthly fluoride fee shall apply to every water service connection within the City. For purposes of the Fluoride Fee set forth herein, water service connection shall mean any water service connection within the City providing culinary water to any residential or commercial customer; provided, if a water service connection serves more than one residential dwelling unit, the Fluoride Fee shall be charged for each residential dwelling unit.

B. DRAINAGE UTILITY FEE SCHEDULE ⁵³

1. Definitions

For purposes of this Schedule, the following words shall be defined as follows:

- (a) *Developed Parcel*

“Developed parcel” means any parcel that has been altered from its natural condition by the construction of improvements or other impervious surface areas or by grading or filling of the ground surface areas which grading or filling affects the hydraulic properties of the parcel.

^f Charged in circumstances of non-payment of culinary water bill or as otherwise deemed appropriate.

(b) *Equivalent Dwelling Unit (“EDU”)*

“Equivalent Dwelling Unit” or “EDU” is based upon the number of plumbing fixture units per building, structure and/or dwelling on a developed parcel. One EDU is defined as twenty (20) fixture units as determined using the most recent edition of the Uniform Plumbing Code, as adopted by the City.

(c) *Equivalent Service Unit (“ESU”)*

“Equivalent Service Unit” or “ESU” means the average amount of impervious surface, expressed in square feet, on developed single-family residential parcels in Centerville City.

(d) *Impervious Surface*

“Impervious Surface” means any hard surface area which either prevents or retards the absorption or entry of water into the soil mantle as it entered under natural conditions pre-existing to development, or any hard surface area which causes water to run off the surface in greater quantities or at an increased rate of flow from that present under natural conditions pre-existent to development. Common impervious surfaces include, but are not limited to: rooftops; concrete or asphalt paving; walkways; patios; decks; driveways; parking lots; storage areas; trafficked or compacted gravel; or other surfaces which similarly impede the natural infiltration into the ground or runoff of storm and surface water.

(e) *Parcel*

The smallest separately segregated unit or plot of land having an identified owner, boundaries, and surface area which is documented for tax purposes and given a tax account (lot) number by the Davis County Assessor.

(f) *Single-Family Residential*

A residential building having only one living unit, or a residential building having more than one living unit, if living units are separately owned and titled.

(g) *Subdrain District*

“Subdrain District” means parcels and/or property located within a defined area or areas of the City specifically benefitted and/or serviced by a subdrain system as more particularly described in Exhibit “A,” attached hereto and incorporated herein by this reference. For purposes of determining the boundaries of the Subdrain District(s) within the City, the following factors shall be considered: actual service connections from the property to a main subdrain system collection line; the ability and/or necessity of the property to connect to a main subdrain system collection line, the proximity of the property to existing subdrain systems; areas or property with an identified subsurface water problem; and property located within developed subdivision containing a subdrain system.

2. *Basis for Drainage Utility Fees*

The purpose of this Schedule is to establish and set forth the fees charged by the Drainage Utility Program. The fees established herein are based upon studies conducted by the City and recommendations made by the Public Works Director. Drainage Utility fees shall be charged for each developed parcel of real property within the City including a storm drainage fee (based on ESU’s) and a subdrain fee (based on EDU’s).

(a) *Storm Drainage Utility Fees*

The two main components of the storm drainage utility fee are (1) the amount of impervious surface on the parcel (expressed in Equivalent Service Units or “ESU’s”), and (2) the amount charged per ESU.

- (i) Single-family residential parcels will be assessed a common storm drainage utility fee, based on the average amount of impervious surface area found on single-family

residential parcels in the City. One ESU equals 3,600 square feet of impervious surface area.^g

- (ii) Non-single family residential parcels will be assessed a storm drainage utility fee based on the actual amount of impervious surface on the parcel.

(b) Subsurface Drainage Utility Fees

The subsurface drainage utility fee shall be assessed against all developed parcels within the City, whether residentially or commercially developed, based upon the equivalent dwelling units (EDU's) on the parcel and the location of the parcel either within or outside of a Subdrain District. Each developed parcel shall pay the required subsurface drainage utility fee for each EDU.^h

3. Drainage Utility Fees ^{i, 54}

(a) Storm Drainage Utility Fees

- (i) Single-Family Residential Parcels

\$8.48 per month (1 ESU)

- (ii) Other Developed Parcels

All other developed parcels, including, but not limited to multiple-family residential parcels, commercial parcels and industrial parcels shall be charged a storm drainage utility fee based on the number of ESU's on the parcel. The number of ESU's shall be established by measuring the amount of impervious surface on the parcel (in square feet), and dividing that number by 3,600 square feet. The actual monthly fee (service charge) shall be computed by multiplying the total ESU's for the parcel by the monthly rate of \$8.48 per ESU. For example, a parcel with 25,000 square feet of impervious surface area shall pay a fee of \$58.89 per month ($25,000 \div 3,600 = 6.944$; then, $6.944 \times \$8.48 = \58.98).

(b) Subsurface Drainage Utility Fees ⁵⁵

- (i) Developed Parcels Outside a Subdrain District:

\$4.24 per month (per EDU)

- (ii) Developed Parcels within a Subdrain District:

\$12.72 per month (per EDU)

4. Credits

Non-single family residential parcels may apply for a service fee credit against the storm drainage utility fees set forth herein in accordance with the Drainage Utility Fee Credit Policy adopted by the City.

^g The City Council finds that the common fee for a single-family residential parcel is justified because (1) each single-family parcel contributes approximately the same amount of storm water runoff, and (2) it would be impractical and difficult to administer the utility if each single-family residential parcel were to be measured individually. The City Council finds the ESU to be an accurate measurement for determining the amount that each parcel contributes to, benefits from, and otherwise uses the storm drainage utility systems. The City Council hereby establishes the amount of impervious surface included in each ESU to be equal to the average amount of impervious surface found on single-family residential parcels. Each single-family residential parcel will pay the fee for one ESU. Based upon a sampling of single family residential parcels, the City Council finds that one ESU equals 3,600 square feet of impervious surface area.

^h The City Council finds that the EDU and the location of the parcel within or outside of a Subdrain District is the most fair measurement for determining the amount that each parcel benefits from or is otherwise serviced from or responsible for a subsurface drain system within the City.

ⁱ The City Council finds that the following drainage utility fees are reasonable and necessary to fund the administration, planning, design, construction, operation, maintenance, repair and replacement of existing and proposed drainage utility facilities. The following drainage utility fees are hereby established for each parcel of real property within the City.

5. Exemptions

(a) Undeveloped Parcels

Undeveloped parcels shall not pay any drainage utility fees.

(b) Streets

The City Council finds that all streets (publicly and privately owned) are part of the storm utility conveyance system and are therefore exempt from the drainage utility fees set forth herein. For the purpose of this section, “streets” shall include the following:

- (i) Any publicly owned right-of-way.
- (ii) Any property that has been dedicated, deeded or condemned as a street and accepted by the City as a street.
- (iii) Any property that has been abandoned to the public as a street, if the City considers the property a street and maintains the property as a street.
- (iv) Any thoroughfares (publicly or privately owned) that are open to the public, provide access to real property, and are used primarily for vehicular traffic.
- (v) Any railroad right-of-way.

“Streets” shall not include private driveways, or designated drive areas in malls or shopping centers.

6. Amendments

The fees set forth herein may be amended at any time as part of the fees and charges section of the City’s annual budget resolution or in a separate City Council resolution.
